

Company Profile

Pioneers of Low Power Radio

For over four decades we have been providing reliable and trusted HF, VHF and UHF high integrity, wireless data links for performance critical applications. OEMs worldwide trust us to deliver products that perform.

U.K. based and engineer led, we pride ourselves on our history of delivering rapid solutions that are widely respected for their performance and quality, to customers worldwide.

We offer the largest range of low power radio modules in the industry and bespoke design services. Available on all major ISM Band & custom frequencies, our vast portfolio of radio modules are ideal for demanding wireless applications requiring the best of reliability.
